

R-evolution Minima

This turntable represents Audio Consulting's entry-level turntable. It features the same highly optimized direct drive set up and axle assembly as the R-evolution Stealth. While highly sophisticated from a vibration point of view, it is smaller and simpler than the Stealth. The platter is made of wood for optimum sound performance.

Like all Audio Consulting products, it is powered by battery, thus totally immune to mains supply born perturbations. From an ecological point of view, we may say that it uses only 2 watts of power during operation.

Features:

- Direct drive motor; less than 2 w of power consumption during operation
- Axe/shaft assembly weights 8 Kg (without platter) and is made using high tech steel, bronze and ceramics
- Battery power
- Wooden platter
- Leather mat by Jean Hiraga
- Wooden chassis for optimum vibration behavior
- Natural oil treatment of wooden case
- Price: CHF 24'500.00
